Take a screenshot of **ALL** these commands (from steps 1

VSCode UI

Secondly, we will go through a similar process in VS Code control UI. For an overview of how to use VS Code version

Open the repository in VS Code, create a new branch and favorite programming language.

In the newly created branch, create a file titled **PRIVATE** done, create a **.gitignore** file in the root of your repository name of the file if PRIVATE.txt is in the root). The idea is in the .gitignore file (files such as node_modules, .DS_Store

Under the `Source Control` tab, stage the changes and a

****Before committing** and pushing the change, take a screenshot of the current branch as a deliverable.

These are the details which your screenshot should include

Part 3. Using Markdown

Markdown is a commonly used markup language for formatting text. You can find more information about Markdown syntax [here](#).

Create a new file called **index.md** in whatever branch you

```
110-project — -zsh — 130x55

a1issa@Ahmeds-MacBook-Pro ~ % git clone https://github.com/a1issa369/110-project.git
fatal: destination path '110-project' already exists and is not an empty directory.
a1issa@Ahmeds-MacBook-Pro ~ % cd 110-project
a1issa@Ahmeds-MacBook-Pro 110-project % git checkout -b add-read-me
fatal: a branch named 'add-read-me' already exists
a1issa@Ahmeds-MacBook-Pro 110-project % git status
On branch add-read-me
Your branch is up to date with 'origin/add-read-me'.

Changes not staged for commit:
  (use "git add <file>..." to update what will be committed)
  (use "git restore <file>..." to discard changes in working directory)
        modified:   README.md

no changes added to commit (use "git add" and/or "git commit -a")
a1issa@Ahmeds-MacBook-Pro 110-project % git add README.md
a1issa@Ahmeds-MacBook-Pro 110-project % git commit -m "Update readme file"
[add-read-me 8582229] Update readme file
 1 file changed, 1 insertion(+), 1 deletion(-)
a1issa@Ahmeds-MacBook-Pro 110-project % git push --set-upstream origin add-read-me
